

## Legal Notices

This manual and any examples contained herein are provided "as is". JNC makes no warranty of any kind with regard to this manual, including, but not limited to, the implied warranties of merchantability, non-infringement and fitness for a particular purpose. JNC shall not be liable for any errors or for incidental or consequential damages in connection with the furnishing, performance, or use of this manual or the examples contained herein.

Reproduction, adaptation or translation of this manual is prohibited without prior written permission of JNC Service B.V.

**CAUTION: This Quick Reference Guide may be revised or withdrawn at any time without prior notice.**

This document provides basic usage instructions and information on setting up your DOKKi docking station.

## UNPACKING

***Do NOT use a knife to open the package or contents as this may result in damaging the product(s)!***

Open the outer box on the top-side. Take the docking station from it's box and remove the bubble-foil.

## REMOVING TRANSPORTATION TAPE

Several parts have been secured with orange tape, to prevent them from possibly moving during transport.

Locate and remove all the orange the tape gently and verify that these parts are in their original operational position. If not, re-fit or re-insert as necessary.

## BOX CONTENTS

- CMT-30 (v5) docking cabinet

*Promotional items aren't listed here.*

The CMT-30 (v5) will fit Opticon scanner models OPN-2001, OPN-2005 and OPN-2006.

*Always check our website for the latest list of models that fit if your model isn't listed here.*

The insertion area is as tight as possible to ensure stability for the OPN scanner. That also means that the OPN won't fit any more when used in combination with any available OPN sleeve or case (rubber, leather, etc.).

See our SPC model docks (like the CMT-6SPC and CMT-30SPC) for applications where a protective case is required. This line of docks is specifically designed to operate the OPN scanners with our SPC-2-xxx cover installed.

*Other models (for example the OPN-2002, OPN-2003 and OPN-2004) won't fit.  
Trying to insert unlisted models will result in damage to the docking cabinet and other scanner model!*

## POSITIONING

The CMT-30 v5 has rubber feet on the bottom and can be used as a desk-stand. Please make sure the docking station is positioned on a firm background which is level.

**Don't place the dock in direct sunlight or in places with a high temperature (near radiators or other heat producing devices), as this can damage the dock, or shorten its lifespan.  
Don't expose the dock to rain, water, wetness or high humidity.**

## POWER AND CONNECTION

Input: 100–240V AC, 50/60Hz

After unpacking and positioning, simply plug the power connector (type: Schuko F) in the wall outlet. The docking cabinet is now ready for use.

## USAGE

### CHARGE ONLY

The CMT-30 v5 is a 'charge only dock'. All thirty ports are powered and can be used to charge scanners in all positions at once.

### COMMUNICATION

The CMT-30 v5 has no external communication available.

Our CMT single-bay and six-bay docks offer data transfer capabilities for applications where USB communication is required.

## MAINTENANCE

The dock is equipped with mini-USB contacts, which are open by nature.

Keep the dock as clean as possible and prevent contaminations entering the dock and/or USB ports.

***Before starting maintenance ALWAYS disconnect the docking station from the power outlet.***

Clean dust from the outside of the dock with a moist cloth (non dripping). Prevent moisture getting inside the docking station and/or its USB connectors. Additionally to clean the inner part of the USB connectors with compressed air.

### DOCKING YOUR SCANNER

Hold the scanner between your thumb and index finger on the OPN's body where USB connector is situated in the side (thus, not in the middle but more to the left side, USB connector pointing downward). Simply connect your scanner to the docking station by gently placing the OPN over the dock to align the connectors. When aligned press the scanner down to secure the connection.

CMT-30: docking your scanner

**Press firmly but never use excessive force when pressing down as this might damage the connectors!**  
***Check for obstructions on both connectors and retry connection.***

### ACCESSORIES

Please check our website for available accessories.

TROUBLESHOOTING

*contact your dealer in case the problem with the dock persists*

If you have any questions regarding the use of the DOKKi.eu docking station please contact your dealer.

BY OPENING THE PACKAGE OF THIS PRODUCT YOU AGREE TO BECOME BOUND  
BY THE LIABILITY AND WARRANTY CONDITIONS.

**Limited Warranty, Liability and Disclaimers**

This Limited Warranty and Disclaimer extends only to products purchased directly from DOKKi.eu or a DOKKi.eu Authorized Dealer as stated on our website (<http://www.dokki.eu/dealers>).

Under no circumstance JNC will be liable for any direct, indirect, incidental, special, consequential, punitive, or exemplary damages, including but not limited to, damages for loss of profits, revenue, income, goodwill, use, data, or other intangible losses that arise from use or inability to use the CMT-30, even if JNC has been informed about the possibility of such damages.

The DOKKi.eu CMT-30 is warranted for a period of one year after purchase, covering defects in material and workmanship. JNC will repair or, at its opinion, replace products that prove to be defective in material or workmanship under proper use during the warranty period. The warranty does not apply to defects resulting from (a) improper or inadequate maintenance measures taken; (b) interfacing parts or supplies not supplied or authorised by JNC; (c) unauthorized modification or misuse; (d) operation outside the applicable environmental parameter limits specified for the product; or (e) improper site preparation or maintenance for installation.

Outside The Netherlands, return the product to your dealer. Follow the instructions provided by your dealer.
