

SPF-3

Silicone Protective Case for Opticon OPN3002 / OPN4000 with USB flap

This silicone case fully encloses the scanner, offering maximum protection for your scanner without compromising its functionality. Available in color blue (SPF-3-BLU).

The anti-skid surface provides a good grip. The USB flap covers the connector opening when in use, making it harder for dust and dirt to get into the connector and scanner. Even though there are no openings for the beeper it still can be heard.

The scan button is covered and feels natural to operate as the design follows the scanners' contours. The bright LED is still visible as well. Below the large scan button a little raised bubble enables easy access to the small function button.
