

CMT-30 (v5)

30-bay Docking Station for Opticon models OPN-2001, OPN-2005 and OPN-2006

This unique thirty-bay docking station charges up to 30 Opticon OPN-2001's, OPN-2005's and OPN-2006.

This model features larger power supplies, ensuring fast charging of the scanners. The increased docking-bay height for the scanners provides easier insertion, better stability and a more secure connection. Offering a complete overview of what's there at a glance makes it easier to manage all scanners, and, while being inserted, the OPN's are securely stored as well.

A single power cable runs from the dock, thus needing only one power outlet to charge all 30 scanners at once. Our CMT single-bay and six-bay docks offer data transfer capabilities for applications where USB communication is required.

OPN-2001 & OPN-2006 docked in CMT-30*
*barcode scanners NOT included
