CPN-30 (v2)

30-bay docking station for Opticon OPN-3002 and OPN-4000

This 'charging only' dock is designed to fit any mix of up to thirty OPN-3002i, OPN-3002n, OPN-4000i and OPN-4000n scanners.

This model features larger power supplies, ensuring fast charging of the scanners. Offering a complete overview of what's there at a glance makes it easier to manage all scanners, and, while being inserted, the OPN's are securely stored as well.

A single power cable runs from the dock, thus needing only one power outlet to charge all 30 scanners at once. Our CPN single-bay and six-bay docks offer data transfer capabilities for applications where USB communication is required.
