

CLK-4

4-bay USB Docking Station for Opticon models OPH-3000 / CLK-3000

This four-bay USB docking station adds flexibility and usability to your Opticon OPH3000, CLK3000 & SMART handheld batch terminals. Whilst in the cradle all buttons are still accessible for operation. The slight angle backwards offers easy visual checking of any displayed message. Its design complements that of the terminal.

This cradle can be used for both charging and communication. Simply connect the docking station to your system with the USB cable supplied with your Opticon terminal. Depending on the operation mode of your terminal (serial device or mass storage device) each terminal will create it's own random Virtual Com Port (VCP) or Drive letter on the PC accordingly.

CLK-4 shown with OPH3000 and CLK3000*
*terminals NOT included

Box contents:
