

CPN-1SPC

Docking station for Opticon OPN-3002 and OPN-4000 with SPC-3

Specifically designed to fit the OPN-3002i, OPN-3002n, OPN-4000i and OPN-4000n with our SPC-3-xxx Silicone Protective Case installed. Enjoy the additional protection of the DOKKi SPC-3 case whilst still being able to dock the scanner without having to remove the silicone case before docking.

The CPN-1SPC can be used for charging and USB-HID communication. By design USB-HID emulates keyboard input and should be manually limited to one scanner transmitting data at a time. New functionality like USB (VCP) communication will only become available if Opticon releases new firmware that supports this.
