

SPC-3

Silicone Protective Case for Opticon OPN3002 / OPN4000 for usage with DOKKi 'SPC' model docks

This silicone case is specifically designed to operate in conjunction with our DOKKi 'SPC' docks, like the CPN-6SPC and CPN-30SPC. The case encloses the scanner, offering extra protection whilst still being able to dock the scanner without having to remove the silicone case. This case is currently only available in blue (SPC-3-BLU).

The anti-skid surface provides a good grip. Even though there are no openings for the beeper it still can be heard. The large scan button is covered and feels natural to operate as the design follows the scanners' contours. The bright LED is still visible as well. Below the large scan button a little raised bubble enables easy access to the small function button.

SPC-3-BLU
