

Description

 1D barcode  USB Mass Storage Device

Simply and efficiently take orders and orders with the Opticon OPH-3001 barcode terminal.

With the scanSYNC Order application Standard bundle you have everything you need to easily take orders or, for example, to register the issuing and receipt of goods.

The only requirement is a PC with a free USB port. **No drivers** and **no communication software** are required.

By default, the scanner will store the quantity 1 in the order of each item that is scanned. If desired, a number can also be easily entered. The scanner will save this number as soon as you scan the next item.

As soon as you have finished scanning the order, it can be reported ready. If necessary, a new order can then be started with a new reference.

The OPH-3001 stores all collected information in a single CSV file, which can be easily copied from the OPH-3001, just like a USB stick.

What's in the KIT:

- the Opticon OPH-3001 barcode terminal, including battery and handstrap;
- a license of the scanSYNC order software pre-installed on your OPH-3001;
- a DOKKi CLK-1 docking station;
- a USB cable.
