

Description

The Opticon OPC-3301i is a compact handheld CCD scanner using Bluetooth to communicate with other devices. This wireless device is equipped with an aggressive scan engine providing quick and easy scanning. In order to increase productivity, the Opticon OPC3301i can read low-contrast barcodes, as well as high density (condensed) barcodes.

Product Features

The pistol grip shape of the Opticon OPC-3301i is specifically designed for ergonomic scanning. It naturally fits in your hand, enabling comfortable use all day. The scanner weighs about 120 grams. The housing provides reliable operation and protects the engine from drops up to 1.5 meter onto concrete.

Wireless communication

The Opticon OPC3301i uses the widely available and reliable Bluetooth wireless communication protocol, which allows the scanned data to be instantly transmitted to any Bluetooth capable device.

Scanned data is stored on-board the Opticon OPC-3301i in case the Bluetooth receiver moves out of range or is temporarily unavailable. This prevents data loss as well as loss of retracing time, contributing to continuous mobile working.
