

Description

 1D barcode  2D barcode  USB HID&VCP  USB MAC  IP42

The L-22X is a welcome addition to our cabled scanners product range. The 2D image scanner has a modern design, scans at a speed of 100 fps and is designed to balance perfectly in your hand. As a result the scanner delivers a comfortable scan experience.

Applications

The L-22X is a cabled scanner that scans both 1D and 2D at a fast speed. Therefore this scanner is very suitable for retail and service tasks, like a check-out counter or on a service desk. This scanner is also used in postal applications, warehouses and healthcare business processes.

How we describe the L-22X

The L-22X is a fast 2D imager that scans at a fast speed of 100 frames per second. The scanner is lightweight and ergonomically designed so it balances perfectly in your hand. Furthermore, the cabled scanner comes with USB or RS-232 and in either black or white. The black or white combined with the sleek design will make sure that the scanner looks good on any counter or desk.

In addition, the device is delivered with a stand that activates the auto-trigger enabling hands free scanning action. Moreover the device is sealed up to IP42 and is resistance to drop of 1.5 meters onto a concrete floor.

Features

The L-22X should be your next cabled scanner and here is why:

- 1D & 2D scanning at 100 fps
- Ergonomic design
- Auto trigger modus
- Delivered with stand
