## Description

---

The OPL-6845S is an elegantly designed handheld scanner with a modern look and feel, and the option for hands-free scanning. It is the scanner that will look good on a check-out counter or service desk while providing rapid and accurate scanning.

---

## Applications

The OPL-6845S is used in service and retail oriented environments due to the scanner being reliable to scan with and being non-reliant of a battery. This scanner is often bought to be used on service counters, retail check-out counters and smaller warehouses.

## How we describe the OPL-6845S

The OPL-6845S is a powerful laser scanner with a speed of a 100 scans per second. With an ergonomically sleek design this scanner is made to hold comfortably in your hand while scanning. The scanner has a manual trigger modus and an auto-trigger modus that, with the separately sold stand, can enable hands-free scanning. The plated base ensures motion stability during scanning and this scanner is IP42 rated; withstanding drops up on concrete from 1.5 meters.

## Features

Below some of the OPL-6845S's features to give an overview of its unique capabilities:

- Up to a 100 scans per second
  - Beautiful design
  - Exchangeable cable
  - Stand included
-
