Opticon H-28 - 4G version

The H-28 is an ergonomic mobile computer that comes with the Android 6.0.1 operating system, that has the functionality of a computer and a 2D scanner, but with the experience of a smartphone. A 16 MP camera with autofocus is included. With the 5 inch full color FHD touch screen, the H-28 is very user-friendly and a sight for sore eyes. We offer the SDK upon your order, easily supporting the design of your application according to your business' needs. Because it has 4G, Wi-Fi, GPS, and Bluetooth the H-28 is always connected, and ensures real-time data transfer.

The H-28 is equipped with GPS, and can therefore be always traceable. Furthermore, the H-28 provides valuable information that can be used to analyze the workflow. It also comes with a USB-port for data transfer, and a long life strong battery. For demanding applications an extended battery is available. Altogether, the H-28 is the ideal scanning, analyzing, and service device for workflow optimization.
