Applications

The C-41S enjoys popularity in several markets including retail, logistics, ticketing, and postal. Our existing customers are very satisfied with their purchase and still receive the many benefits that a scanning solution brings. Will you be the next customer to enjoy the benefits of our scanning solution?

How we describe the C-41

The C-41S is a durable CCD handheld scanner that scans at a speed of 300 scans per second. Due to the wide optical window, it is easier to scan all 1D barcodes. The ergonomic design ensures a perfect balance when the scanner rests comfortably in your hand. The barcode scanner looks good on the counter of any store or service desk, blending in with the design of the environment.

The scanner is available with a USB interface and is easily programmable to suite your application. This scanner is really easy to use; the plug and scan experience make this scanner very suitable for first-time users as well as long time users. The white version is anti-microbial, making it perfect for the healthcare market.
