

Description

The OPN-3102i is a 2D companion barcode scanner in a compact design. It is lightweight and fits easily in your pocket, making it the ideal companion scanner to bring along. It has real-time data transfer through Bluetooth and, when no connection is available, can store data locally as well. The OPN-3102i supports Apple MFi as well. The integrated NFC tag enables easy Bluetooth pairing and the device can also be charged wirelessly.

Applications

The OPN-3102i enables organizations to easily integrate barcode scanning in their business process or service to optimize efficiency. The simplicity of this scanner enables people to use it with only a short introduction, an easy way to start optimizing with. Some of the uses include field sales and service, retail point-of-sale, inventory management, asset tracking and visitor registration.

How we describe the OPN-3102i

The OPN-3102i is a powerful 2D scanner equipped with a high capacity battery so the scanner can go for hours without charging. The Bluetooth connection facilitates real-time data transfer to your system and is able to connect with any device including Apple. This means that any data shared with an Apple product is transferred more quickly. This companion scanner is also resistant to drops up to 1.5 meters without the need for special protection. The OPN-3102i comes in black and white, and the dedicated CRD-3000 cradle charges your device wirelessly. The OPN-3102i looks sleek, modern, and scans up to 100 fps.

Using the OPN-3102i is simple and straightforward. One button to scan the barcode and one button to correct any mistakes made, both actions providing visual feedback for smooth interaction.

Features OPN-3102i barcode scanner
