

Description

As the Android platform quickly develops, we at Opticon work simultaneously to provide our customers with the top of the line mobile computers. Proceeding a successful launch of the H-33, Opticon now offers our newest mobile computer with Android 11 capabilities, the H-35.

Opticon's Android devices are the ideal solution for today's modern mobile workforce, by integrating barcode scanning, analytics, and service solutions for industries such as logistics, postal services, healthcare, merchandising, and transportation. The H-35 is equipped with a powerful Opticon 2D imager barcode scanner, Bluetooth 5.1 and NFC supported.

The rugged H-35 comes with a 13 MP rear-facing camera with autofocus and LED flash, high capacity battery life for workers on the go, and a high-end scanner with Opticon's superior barcode scanning technologies. The H-35 is dust and water-resistant, it is built to withstand the toughest work environments with its rugged design and IP65 rating. The 5.5 inch Gorilla Glass touch screen also protects the devices from scratches and shattering. With the option of an additional rugged rubber boot, the device can even withstand a drop up to 2.4m.

Reliable

Opticon provides full and immediate support via your local office for all of our devices. With the H-35, you are investing in a fully supported product, which includes a two-year warranty. To extend the durability of mobile computers, a bumper accessory is available and much more. Included is a software development kit so you can customize your product according to your wishes.

Accessories

Opticon offers a load of optional accessories to fit your needs. There is also a version available (conditions apply) that features a ToF (time-of-flight) camera, which measures the dimensions of your parcel. Contact your local office for more information.
