

Description

 IrDA  RS232  USB VCP-only

The Opticon CRD9723 RU cradle is equipped with charging & communication features for Opticon's smaller sized batch terminals, like the OPL-97XX series, OPL-9815 and PX-36. The cradle charges the scanner while docked. The IrDA interface handles data transmission between scanner and cradle whilst the RS232 or USB interface provides external data communication.
