Description

OPN-2001 PC Companion Application / Demo software (EGF3800G)

Retrieve data from your OPN-2001 or scanner running 'OPN-2001 simulation application' (i.e. OPN-2006, PX-20).

- includes CMT docking station (multicradle) support, or enables to connect multiple OPN's simultaneously to your PC.

- OPN-2001 installer for Windows
- OPN-2001 application for Mac

The PC Companion Application allows Manual or Automatic operation modes.
Mind that, depending on the operation mode, some features are manually unaccessible when in Automatic Operation mode and vice-versa.

Features:

- view device firmware version
- update device firmware
- get date/time values from RTC (Real Time Clock)
- set/send the PC date/time values to RTC (synchronize date and time)
- view device serial number
- download scanned barcode(s) from memory
- formatting options: save data to txt or csv file format; select column delimiter; time in 12hr or 24hr format; date in EU, US or Long format
- delete scanned barcode(s) from memory
- reset the device to factory defaults
- alter the device operational settings (sybologies, beeper, memory handling, LED settings and more)

    Note that the **USB Drivers** need to be installed first.
    Also verify to use the latest available **Firmware** to maximize available features and usability.
