

Description

 1D barcode  USB HID&VCP  USB MAC  IP42

The OPR-3201Z is a true performer with a high plug- and play factor. The handheld laser scanner has an auto-trigger function, making hands free operating a possibility. The large pistol grip makes aiming at barcodes easy and comfortable, enabling the user to focus fully on the task at hand.

Product Features

The OPR-3201Z is an auto-trigger, handheld scanner with plug and play functionality that speeds up the workforce. It comes with an RS-232 USB cable and a keyboard wedge. The scanner can be ordered in black or white. The complementing stand initiates the auto-trigger making hands free scanning a viable option. The larger grip of the device provides easy targeting and the ingenious placement of the scanning components in the device assures the right balance when holding. It can be plugged into any device with a USB port and it is ready to start scanning. The OPR-3201Z is also lightweight with only 80 grams and can withstand drops up to 1.5 meters onto concrete. The OPR-3201Z does not require any technical know-how to set it up and the set-up only takes a few minutes, which makes this device a quick scanner that makes life easier.

Applications

The OPR-3201Z is often used in service-related tasks such as product scanning in shops, administrative tasks, or ticket control at the entrance of an event. These examples are of course just the tip of the iceberg because this scanner is one of Opticons most popular products since its birth over a decade ago.
