

Description

 1D barcode  2D barcode  USB HID&VCP  IP52

The Opticon M-10 is an omni-directional presentation scanner. Offering our high performance 2D CMOS Imager along with a well thought out ergonomic design, which allows the scanner being used in the hand or traditionally on a desk with its adjustable stand.

Product Features

The combination of an impressive design, ease of use and an excellent price-performance ratio make the M10 the ideal solution for point-of sales (POS) check-out applications, reading barcodes from mobile phones in mobile marketing applications and document handling within banks and post offices. If necessary the stand can be attached to a wall or bench by using the two screw holes.
